Dear Sirs

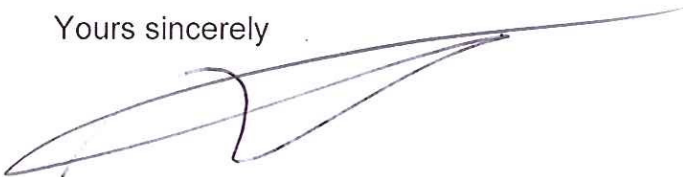

Redbridge Sports & Leisure, Forest Road, Ilford, Essex, IG6 3HD

Redbridge Sports and Leisure is a new build steel framed sports hall to provide training facilities for Badminton and Netball for the 2012 Olympic Games and beyond. Flood Flooring provided the specialist contractor design floor construction at first and second floors to the amenity portion of the building. Flood Flooring wide slab units were adopted in lieu of a metal deck floor construction with a structural topping and nominal mesh. Flood assisted us in specifying their flooring system to act compositely with steel beams using shop welded shear studs and thus avoid an additional process on site with consequent health & Safety and programming implications for the main contractor.

Flood Flooring were proactive, attended design team meetings and provided quick answers to technical queries. They also produced design calculations to justify the vibration performance of the floor for rhythmic activities in the studios.

The floor system was installed without event and no site queries were raised. I am pleased and impressed with the service from Flood Flooring and I will be happy to specify them again on future projects. I have no reservations in recommending them for future work and look forward to working with them again in the future.

Yours sincerely

Nigel Matthews
Director Designate
On behalf of PEP Civil & Structures
