To Whom It May Concern

Dear Sir / Madam

Sub Contractor Reference for Flood Flooring

We have been asked to provide a reference for the above mentioned company, who we believe are hopeful of undertaking future projects with yourselves.

We have recently undertaken and successfully completed our first project with Flood Flooring in the Devon area. The Flood Flooring option was chosen for our prestigious project at South Devon College, Paignton, where the client specifically wanted exposed concrete soffits within the building.

Prior to employing the services of Floor Flooring we were invited to inspect a recently completed project they had been involved with. The quality finish that we inspected was of the highest standard and therefore, gave ourselves no hesitation in employing their services for our project. We have found them to be very proactive in their approach not only towards on site activities, but also their approach to commercial aspects. In particular the design process was quick and smooth and they were able to meet our very tight programme dates, which was another big plus for ourselves.

Flood Flooring are very responsive towards Health, Safety and the Environment and always provided the relevant information required. Although they did not directly install the units they advised on the best installation method, appropriate lifting equipment. This whole process ensured that we achieved the quality, which is of a high standard. As a testament of this our Client at South Devon College has acknowledge this also.

I trust the above is of assistance to yourselves, but should you require any further information then please do not hesitate to contact myself.

Yours Sincerely

Nick Rowe
