

Twin Wall

Twin wall is an adaptable wall system that provides the speed and quality of precast concrete with the structural and waterproof reliability of a continuously poured in-situ concrete structure.

Benefits Of Flood Precast Concrete Twin Wall

- Time Savings.
- No need for formwork.
- Reduced drying out time for buildings.
- Reduced costs.
- No limitation to structural options.
- Paint ready smooth surfaces.
- Low Risk – Fewer personnel required on site.
- Excellent sound and fire resistance.
